Pursuing B.Tech in CSE
Data Science Enthusiast

aasthapatel2525@gmail.com 

Ahmedabad, Gujarat 

ABOUT ME

Enthusiastic Data Science fresher skilled in Python, Machine Learning, MySQL, and Visualization. Experienced with scikit-learn, pandas, NumPy, and Matplotlib. Strong understanding of statistics, supervised/unsupervised learning, and data preprocessing. Seeking an entry-level Data Scientist role to apply analytical and modeling skills.

EDUCATION

Seventh-day Adventist Higher Secondary school , Ahmedabad - Secondary Examination (10th std), ICSE, 2020 - 75%

Gayatri Vidhayala , Ahmedabad - Higher Secondary Examination (12th std), GSEB, 2022 - 63%

Indus University, Ahmedabad - Pursuing B.Tech in CSE, 2022 - Current, CGPA – 8.7

SKILLS

Programming & Scripting Languages : C , Python , HTML , CSS , JavaScript

Framework : Flask

Database & Backened Tools : MySQL , Power BI

Other Tools & Platforms : Git / Github , VS code , Canva

CERTIFICATIONS

Introduction And Evolution of Futuristic Technologies with applications , Indus University

Complete AI & Machine Learning Data Science Bootcamp , Udemy

Machine Learning with python , freecodecamp

Complete Core Java in Simple Way , Udemy

Innovate With Full Stack , Indus University

PROJECTS

AI-POWERED-BRAIN-TUMOR-DETECTION-SYSTEM

July 2025 – December – 2025

- Developed an AI-based MRI Brain Tumor Detection System using a trained CNN model (Keras/TensorFlow).
- Built a full-stack Flask web application with secure MRI upload, preprocessing, and real-time tumor prediction.
- Designed a responsive frontend using HTML, CSS, JavaScript, featuring drag-and-drop uploads and animated results.
- Integrated PDF report generation, MRI preview, and confidence scoring for analysis interpretation.
- Utilized Git LFS to manage large model files and optimize deployment.
- Conducted model training, evaluation, and visualization through Jupyter Notebooks using medical imaging datasets.

Skills: Flask · Python · HTML · CSS · Machine Learning · Data Science · GitHub

Weather-Aware and Occasion-based outfit Recommendation using KNN Algorithm

August 2025

- Developed a weather-aware outfit recommendation system using KNN to suggest the most suitable clothing combinations for users.
- Integrated OpenWeatherMap API to fetch real-time temperature and weather conditions for accurate, location-based recommendations.
- Applied Label Encoding and feature engineering on fashion attributes such as style, occasion, suitable weather, and temperature.
- Implemented KNN similarity search to identify top matching outfits based on encoded features and environmental conditions.
- Displayed recommendations with images, using automated image retrieval and visualization for an interactive user experience.

Skills: Machine Learning · Pandas · Matplotlib · Python

Retail Sales Optimization Using Power BI and Data Analytics - (MINI -PROJECT)

November 2025

- Identify which product categories and sub-categories contribute most to revenue
- Understand regional variations in sales and profit performance
- Detect seasonal or monthly trends that affect demand
- Analyze customer buying behavior and payment preferences
- Monitor order fulfillment efficiency, including shipping modes and delivery timelines
- Pinpoint areas of declining profit or potential growth opportunities
